Reza Fauzan Adhima

Fullstack Developer

+6285183356072 | rezafauzan.a@outlook.com | Jakarta, Indonesia

LinkedIn | Github | Portfolio

Fullstack Web Developer with 4+ years of freelance experience building and deploying scalable web applications. Strong in backend development using **Golang, PHP**, and **Java**, with hands-on experience delivering e-commerce platforms, dashboards, and internal systems. Proficient in React, relational databases (**MySQL**, **PostgreSQL**), **Docker**, **Git**, and **VPS** deployment, with a focus on clean architecture and maintainable systems.

EXPERIENCES

PT Global Energi Lestari - **Bandung, Indonesia** June 2026 - Present

Staff Backend

Legal Management - Legal Management System Internal Web App | *July 2026*

- Built the Legal Management System from scratch, including database design (ERD), API architecture, and API contract documentation to establish a scalable backend foundation.
- Developed RESTful APIs using Go Fiber and integrated the system with internal applications through OpenAPI, securing endpoints with API Key middleware for authenticated communication.
- Implemented core frontend features to support project delivery while developing backend services, collaborating across the full application stack.

Tech Stack: ***Go Fiber, Squirrel, PostgreSQL, Docker, Redis, Firebase***

Procurement - Supplier and Back Office Procurement Internal Web App | *June 2026*

- Contributed to the continued development of two interconnected internal procurement applications, completing unfinished backend modules and enhancing existing features.
- Developed and maintained RESTful APIs and business logic, implementing asynchronous communication between the applications using **RabbitMQ** to ensure reliable event-driven integration.
- Optimized database queries and backend performance while collaborating with frontend developers and stakeholders to deliver stable and maintainable procurement solutions.

Tech Stack: ***Go Fiber, Squirrel, PostgreSQL, Docker, Redis, RabbitMQ, Firebase***

PT Nashta Group Global Utama - **Depok, Indonesia** April 2026 - May 2026

Backend Developer

Assets Tracker - Office Asset Management System | *April 2026*

- Contributed to the development of *Asset-Tracker*, an internal office asset management system designed to digitize inventory records and improve asset transparency across the organization.
- Transformed manual inventory processes into a centralized digital system, improving data accuracy and accessibility, and reducing manual lookup time from minutes to seconds.
- Designed and documented API specifications using Swagger and Postman to standardize backend communication and improve collaboration between frontend and backend development teams.

Tech Stack: ***Gin Gonic, GORM, PostgreSQL, Docker***

Koda Tech Academy - **Depok, Indonesia** Dec 2025 – Apr 2026

Fullstack Web Developer

Coffee Shop - Coffee Shop E-Commerce Web App | *December – April 2026*

- Developed a full-featured Coffee Shop e-commerce platform with responsive UI for both mobile and desktop users.
- Built a modular frontend using React.js, Tailwind CSS, React Router, and Redux Toolkit, with role-based access for users and admins.

- Deployed the system using a microservices architecture consisting of separate Frontend service, Backend service, Redis for caching/session management, and PostgreSQL as the primary database, ensuring scalability and maintainability.

Tech Stack: ***ReactJS, Gin Gonic, TailwindCSS, ESLint, PostgreSQL, Docker, Redux***

Infinity Shortlink - Link Shortener | *December – April 2026*

- Built frontend and backend systems with complete end-to-end functionality under tight deadlines.
- Designed and implemented RESTful APIs for link generation, redirection, and analytics/data management.
- Successfully deployed the application to a VPS production environment.

Tech Stack: ***ReactJS, Gin Gonic, TailwindCSS, ESLint, PostgreSQL, Docker***

Snow x Infinity - **Bandung, Indonesia** Jun 2022 - September 2025

Fullstack Developer (Freelance)

Company Profile Website - Topi (Hat To Go) | *September 2025*

- Developed a responsive company profile website to showcase products and business information using NextJS and Tailwind CSS with a mobile-first, responsive design approach.
- Improved business online presence by delivering a fast, mobile-optimized website that enhances user experience across devices and strengthens brand visibility.

Tech Stack: ***NextJS, TailwindCSS***

Content Management System - Zifinity Personal Portfolio | *March 2024*

- Developed a responsive personal portfolio website with a CMS, implementing a microfrontend architecture to modularize the portfolio and blog sections using NextJS, Tailwind CSS, Supabase, and Vercel.
- Enabled dynamic content management and improved personal branding visibility by allowing easy publishing and updating of articles through a scalable and modern web architecture.

Tech Stack: ***NextJS, TailwindCSS, Supabase, Vercel***

Kecamatan Administrative Dashboard (Simpelkan)| *June 2023*

- Developed a district administrative web application to manage citizen document requests and official correspondence using Laravel, Bootstrap 5, MySQL, and Chart.js with an interactive dashboard interface.
- Improved administrative efficiency by streamlining document request processing and providing real-time data visualization to support faster and more informed decision-making.

Tech Stack: ***Laravel, Bootstrap 5, MySQL, ChartJS***

Biomedical and Genome Science Initiative | ***August*** *2022*

- Developed a responsive company profile website for a healthcare facility using modern web technologies to present services, facilities, and institutional information in a structured and accessible format.
- Improved digital presence and information accessibility for stakeholders and patients by delivering a clear, user-friendly website optimized for both mobile and desktop users.

Tech Stack: ***NextJS, TailwindCSS***

Meliau Hilir Village Correspondence System | ***June*** *2022*

- Developed a village-level administrative web application to manage citizen document requests and official correspondence using CodeIgniter 4, Bootstrap 5, MySQL, and Chart.js with an interactive dashboard interface.
- Improved administrative workflow efficiency by digitizing correspondence processes and enabling faster document tracking and reporting through centralized data management.

Tech Stack: ***Codeigniter 4, Bootstrap 5, MySQL, ChartJS***

Kawah Edukasi - **Bandung, Indonesia** Nov 2022 – Feb 2023

Backend Developer

Barans Absensi - Coffee Shop E-Commerce Web App | *February 2022*

- Developed backend services for an employee attendance system using Java Springboot, implementing core features such as attendance recording, user management, and RESTful API integration for client

applications.

- Designed a lightweight backend architecture to improve system performance and scalability, ensuring efficient and reliable attendance data processing.
- Utilized PostgreSQL, Swagger, and Postman for database management, API documentation, and endpoint testing to support stable and maintainable backend development.

Tech Stack: ***Java Springboot, Postgres, Swagger, Postman***

PT LEN Industri Persero - **Internship**

Project Manager & Backend Developer *Mar - Apr 2021*

AI Smart Gate | *March - April 2021*

- Led end-to-end development of an AI-powered SmartGate system, integrating image recognition for mask detection, temp measurement to ensure COVID-19 compliance
- Designed and implemented backend APIs using Laravel 8 with MySQL, and developed microcontroller logic to automate hand sanitizer, disinfectant dispensers, and gate operations.
- Managed project budgeting, scheduling, and team objectives, successfully delivering the system on time during pandemic constraints and internship.

Tech Stack: ***Laravel 8, MySQL***

Tim Sukses Teh Nia - **Bandung, Indonesia** Dec 2020

Fullstack Web Developer

Quick Count Sibadak | *December 2020*

- Developed a web-based quick count monitoring system for regional election vote tracking using Laravel, Tailwind CSS, MySQL, and Chart.js with periodic updates to simulate real-time result visualization.
- Migrated the system from CodeIgniter + Bootstrap to Laravel + Tailwind CSS to improve code maintainability, scalability, and development efficiency.
- Ensured system reliability during live election operations by providing continuous monitoring and support to maintain data accuracy and application stability throughout the event.

Tech Stack: ***Codeigniter 4, Laravel, TailwindCSS, ChartJS, MySQL***

EDUCATION

Koda Tech Academy - **Depok, Indonesia** **December 2025 - April 2026**

Fullstack Web Developer

- Learnt front-end development practices: React Js, Redux Toolkit, Tailwind CSS
- Learnt back-end development practices: Golang, Gin-Gonic, PostgreSQL, Redis
- Basic DevOps practices: Working with Docker, and SSH

Kawah Edukasi - **Bandung, Indonesia** **November 2022 - February 2023**

Backend Developer

- Learnt back-end development practices: Java, Java Object Oriented Programming, Quarkus, PostgreSQL, Dependency Injection, Documentation using Swagger, Team Collaboration, ERD Designing, Agile/Scrum

Software Engineering - State Vocational Highschool 1 Katapang **2019 - 2021**

- Relevant coursework: Web Development, OOP Java, Database Design, Laravel, React

Certifications & Training

- ***Junior Programmer*** *— Badan Nasional Sertifikasi Profesi (BNSP), SMK Negeri 1 Katapang | 2020*
- ***Junior Web Developer*** *— Kementerian Komunikasi dan Informatika Republik Indonesia (VSGA Digital Talent Scholarship) | 2021*

- ***Artificial Intelligence Training*** *— Kamp Kreatif SMK Indonesia | Dec 2020*
- ***Project-Based Online Internship Program*** *— PT LEN Industri (Persero) | 2021*

SKILLS

Frontend Development – React.js, Next.js, JQuery, Redux, Bootstrap, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), Responsive Design, Vite, SEO Onsite
Backend Development – Golang (Gin, FIber), PHP (Laravel, Codeigniter), Java (Springboot, Quarkus), Middleware, JWT Auth, Database Integration, Squirrel, Redis, RabbitMQ
Architecture and Programming Principle – RESTful API, Clean Architecture, Dependency Injection, YAGNI, SOLID, MVC
Database – MySQL, PostgreSQL, Redis, MongoDB, Firebase
DevOps & Deployment – Docker, CI/CD (GitHub Actions), SSH Server, Linux, Microservice, Microfrontend
API Documentation – OpenAPI/Swagger Documentation
Version Control – Git, GitHub
Project Management – Agile/Scrum
Cloud & Hosting – Vercel, Netlify, Shared Hosting, VPS
Security & Best Practices – Input Validation, HTTPS, JWT, CORS, Top 10 OWASP, Sanitation, CSRF, Prevent XSS
Testing – Unit Testing, API Testing, Functional Testing
